AIPULNION[®]

AC/DC Converter DA10-220SXXG9N3

Typical Features

- Wide input voltage range: 85-305VAC/120-430VDC
- ◆ No load power consumption ≤ 0.1W
- Transfer Efficiency 77%(TYP.)
- Switching Frequency: 65KHz
- Protections: short circuit, over current
- Isolation voltage: 3000Vac
- ◆ Meet IEC60950/UL60950/EN60950 test standard
- ◆ Ultra-small package for bare board, industrial design
- ♦ PCB mounting

Application Field

DA10-220SXXG9N3 Series----- a compact size, high efficient power module offered by Aipu. It features universal input voltage range, AC and DC dual-use, low ripple, low temperature rise, low power consumption, high efficiency, high reliability, safer isolation, good EMC performance. EMC and Safety standard meet international EN55032 ,IEC/EN61000. These series have important application for power, industry, instrument and smart home field. For harsh EMC environment, the application circuit in the datasheet is strongly recommended.

Туріс	al Product List								
			Out	put Specifica		Ripple	Efficiency@

Note 1: Due to space limitations, above is only a part of our product list, please contact our sales team for more items.

Note 2: The typical value of output efficiency is based on module is full loaded and burned-in after half an hour.

Note 3: "*" are models being developing.

Note 4: The fluctuation range of full load efficiency(%,TYP) in table is $\pm 2\%$, full load efficiency= output power/module's input power. Note 5: Ripple & Noise is tested by twisted pair method, details please refer to Ripple & Noise test at back.

AC/DC Converter **DA10-220SXXG9N3**

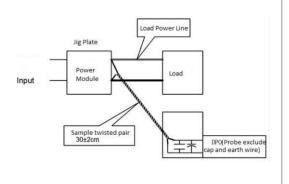

Note: If the definition of pin is not in accordance with the model selection manual, please refer to the label on actual item.

Ripple& Noise Test: (Twisted Pair Method 20MHZ bandwidth)

Test Method:

(1) 12# twisted pair to connect, Oscilloscope bandwidth set as 20MHz, 100M bandwidth probe, terminated with 0.1uF polypropylene capacitor and 10uF high frequency low resistance electrolytic capacitor in parallel, oscilloscope set as Sample pattern.

(2) Input terminal connect to power supply, output terminal connect to electronic load through jig plate, Use 30cm±2 cm sampling line, Power line selected from corresponding diameter wire with insulation according to the flow of output current.

AIPULNION

Note:

1) C1: AC input, C1 is input filter electrolytic capacitor (necessary), recommended value is 10uF/450V;

- DC input, C1 is big filter capacitor in the EMC filter (necessary), recommended value is 10uF/450V;
- 2) R1 is limited resistor, recommended value is 12Ω, 5W;
- 3) MOV1 is piezoresistor, recommended model is 10D561K;

CE RoHS

Note 1:

1. The product should be used within the specification range, or it will cause permanent damage to it;

2. The input terminal should connect to fuse;

3. If the product is worked under the minimum requested load, the product performance cannot be guaranteed to comply with all parameters in the datasheet;

4. If the product is not operated within the required load range, the product performance cannot be guaranteed to comply with all parameters in the datasheet;

5. Unless otherwise specified, parameters in this datasheet were measured under the conditions of **Ta=25°C**, **humidity<75%** with nominal input voltage and rated output load(pure resistance load);

6. All index testing methods in this datasheet are based on our Company's corporate standards;

7. The performance indexes of the product models listed in this manual are as above, but some indexes of non-standard model

products will exceed the above-mentioned requirements, please directly contact our technician for specific information;

8. We can provide product customization service,

9. Specifications are subject to change without prior notice, please follow up with our website for newest manual.
