# **AIPULNION**<sup>®</sup>

# AC/DC Converter DA5-220SXXG9D4

### **Typical Features**

- Wide input voltage range: 85-305VAC/120-430VDC
- No load power consumption  $\leq 0.3W$
- Transfer Efficiency up to 78%(TYP.)
- Switching Frequency: 65KHz
- Protections: short circuit, over current
- Isolation voltage: 3600Vac
- Meet IEC62368/UL62368/EN62368 test standard
- Ultra small size bare board, industrial level design
- PCB mounting

## Application Field

**DA5-220SXXG9D4 Series-----** a compact size, high efficient power module offered by Aipu. It features universal input voltage range, AC and DC dual-use, low ripple, low temperature rise, low power consumption, high efficiency, high reliability, safer isolation, good EMC performance. EMC and Safety standard meet international EN55032,IEC/EN61000. These series have important application for power, industry, instrument and smart home field. For harsh EMC environment, the application circuit in the datasheet is strongly recommended.

#### **Typical Product List**

Typicarrie							
		Ou	tput Specificati	ons	Max.	Ripple&	Efficiency@
Certificate	Part No.	Power	Voltage	Current	Capacitive Load	Noise 20MHz (Max)	Full Load, 220Vac (Typical)
		(W)	u F	mVp-p	%	mVp-p	%
-	*DA5-220S3V3G9D4	3	3.3	1000	2000	100	68
-	DA5-220S05G9D4	5	5	1000	2000	100	74
-	*DA5-220S09G9D4	5	9	556	1000	120	76
-	DA5-220S12G9D4	5	12	416	68	120	78
-	DA5-220S15G9D4	5	15	333	68	120	78
-	*DA5-220S24G9D4	5	24	208	47	120	80

Note 1: Due to space limitations, above is only a part of our product list, please contact our sales team for more items.

Note 2: The typical value of output efficiency is based on module is full loaded and burned-in after half an hour.

Note 3: "\*" are models being developing.

Note 4: The fluctuation range of full load efficiency(%,TYP) in table is  $\pm 2\%$ , full load efficiency= output power/module's input power. Note 5: Ripple & Noise is tested by twisted pair method, details please refer to Ripple & Noise test at back.

#### Ripple& Noise Test: (Twisted Pair Method 20MHZ bandwidth)

#### Test Method:

**AIPULNION**<sup>®</sup>

(1) 12# twisted pair to connect, Oscilloscope bandwidth set as 20MHz, 100M bandwidth probe, terminated with 0.1uF polypropylene capacitor and 10uF high frequency low resistance electrolytic capacitor in parallel, oscilloscope set as Sample pattern.

(2) Input terminal connect to power supply, output terminal connect to electronic load through jig plate, Use 30cm±2 cm sampling line, Power line selected from corresponding diameter wire with insulation according to the flow of output current.

# **AIPULNION**<sup>®</sup>

Note 1: Input Voltage should be derated based on Input voltage derating curve when it is 85~100VAC/277~305VAC/120~140VDC/ 390~430VDC.

Note 2: Our product is suitable to use under natural air cooling environment, if use it under closed condition, please contact with us.

CE RoHS

Note 1:

1. The product should be used within the specification range, or it will cause permanent damage to it;

2. The input terminal should connect to fuse;

3. If the product is worked under the minimum requested load, the product performance cannot be guaranteed to comply with all parameters in the datasheet;

4. If the product is not operated within the required load range, the product performance cannot be guaranteed to comply with all parameters in the datasheet;

5. Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75% with nominal input voltage and rated output load(pure resistance load);

6. All index testing methods in this datasheet are based on our Company's corporate standards;

7. The performance indexes of the product models listed in this manual are as above, but some indexes of non-standard model

products will exceed the above-mentioned requirements, please directly contact our technician for specific information;

8. We can provide product customization service,

9. Specifications are subject to change without prior notice, please follow up with our website for newest manual.
