

Product Typical Feature

- ◆ High baud rate of up to 100Kbps
- ◆ Integrated isolated DC-DC converter
- ◆ Bus Protection
- ◆ Two-port isolation test voltage 3.75kVAC
- ◆ Operating ambient temperature range: -40°C to +85°C
- ♦ The bus supports maximum 256 nodes

Test Condition: Unless otherwise specified, data in the datasheet should be tested under the conditions of inputting nominal voltage, pure resistance rated load and Ta=25℃.

Application Field

RS485-3V3LSAV/RS485-05LSAV Series are transceiver isolation module with integrated power isolation, electrical isolation, and RS485 interface bus protector; The traditional isolation RS485 circuit uses a piece of power isolation module and RS485 transceiver chip to realize the application. Now only a RS485 transceiver module could realize the functions. Simplify the customers on the isolation requirements of the design; Products can be easily embedded in the user equipment, achieve function of RS485 network connection.

Typical Product List

Part No	Input Voltage Range (VDC)			
RS485-3V3LSAV	3.15V-3.45V			
RS485-05LSAV	4.75V-5.25V			

Input Specification

Item		Opera	ting Condition	Value
	Static	Products Powered on,	RS485-3V3LSAV	≤50mA
Dower Input	Current	no communication	RS485-05LSAV	≤40mA
Power Input	Send	100Kbps square wave	RS485-3V3LSAV	≤100mA
	Current comm	communication	RS485-05LSAV	≤80mA
		RS485-3V3LSAV		Compatible with +3.3V UART interface
	Series			only
Single Input	Interface RS-		85-05LSAV	Compatible with +5V UART interface only
		Pin Curr	ent	I _{TXD} ≤2mA; I _{RXD} ≤2mA; I _{CON} ≤2mA

Bus Interface

Item		Value	Value		
Output	RS485 Bus interface	Standard I	Standard RS485 interface, A_{\times} B bus built in 5.1K Ω of the pull-down resistor		
Output isolated voltage	Output isolated power pin	3.3Vdc	3.2-3.6Vdc (only for external pull-down resistor, not recommended for other usage)		
		5Vdc	4.9-5.3Vdc (only for external pull-down resistor, not recommended for other usage)

Design Reference

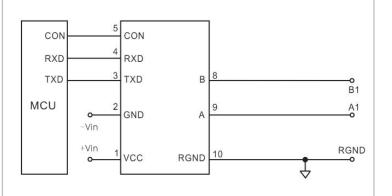

1. Typical Application:

Typical Application RS485 isolated transceiver module is as shown in the photo;

RS485-05LSAV module need to use the 5V power supply, the matching level is 5V, not be suitable for 3.3V system level;

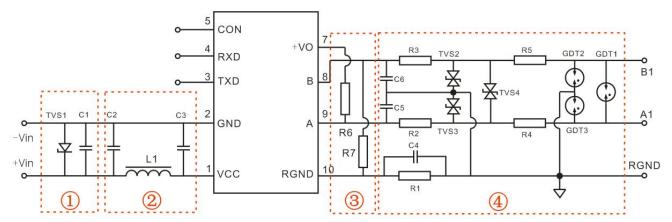

RS485-3V3LSAV module need to use the 3.3V power supply, the matching level is 3.3V, not be suitable for 5V system level;

RS485 transceiver module built-in 5.1K pull-down resistance, R6, R7 is external pull-up resistance, please select the appropriate resistance value according to the actual situation.

Design Reference

- 1. The product should be used under the specification range,hot Hot-swap is not supported, otherwise it will cause permanent damage to it;
- 2. RS485-05LSAV will not support 3.3V system levels, RS485-3V3LSAV will not support 5V level;
- 3. Pin-7 is only provided to connect with the pull-up resistor, and when not in use, it should be suspended;
- 4. If the product worked beyond the load range or below the minimum load, we cannot ensure that the performance of product is in accordance with all the indexes in this manual;
- 5. Unless otherwise specified, data in this datasheet should be tested under conditions of Ta=25℃, humidity<75% when inputting nominal voltage and outputting rated load(pure resistance load);
- 6. All index testing methods in this datasheet are based on our Company's corporate standards;
- 7. We can provide customized product service;
- 8. The product specification may be changed at any time without prior notice.
